

QUALITY POLICY

Andersen Steel Sp. z o.o. is a manufacturer of innovative working parts for agricultural machinery, produced on the base of modern and automated production processes.

The goal of Andersen Steel Sp. z o.o. is manufacturing and sale of products such as springs, stems, shares, goosefeet, tines that meet or exceed customer requirements.

The company's ambition is to guarantee the highest mechanical resistance and life cycle of the offered products.

We are achieving above goals thanks to following:

- fulfilment of applicable requirements of: legal nature, PN-EN ISO9001:2015 standard and interested parties,
- market monitoring and responding to the needs of customers and other stakeholders,
- ensuring open and effective communication with customers, suppliers and employees,
- using the highest quality raw materials and the best technologies in production processes,
- developing employees' competences and taking into account their role and commitment in the process of maintaining and continuous improvement of the QMS,
- maintaining proper and reliable technical infrastructure necessary for the production of offered products,
- continuous improvement of the implemented system.

This Quality Policy supports strategic direction of company's development and is adequate to the purpose of existence and context of the organization. The Top Management undertakes to provide the means necessary to achieve assumed objectives and declares that this Policy has been communicated and made available to all employees of the Company.
